

# COMPASSION ORPHANAGE

## DEMOCRATIC REPUBLIC OF CONGO

**T**hank you for your continued support of the Compassion project in DR Congo. DR Congo has endured decades of violence from the civil war. Weak governance and armed groups have subjected civilians to widespread poverty, violence, and extreme human rights violations. As a result, families have been displaced, and millions of women and children have been widowed and orphaned.

Thanks to your generosity, hundreds of widows and orphans are receiving shelter, food and clothing. The first phase of the orphanage building project is near completion, and soon, the most vulnerable children of Congo will have a place to call home.

### CURRENT IMPACT

After a long and difficult process, 80 additional children in the city have been accepted into the full-time residential program once the home is completed.

NO. MALE RESIDENTS : 50

NO. FEMALE RESIDENTS: 30

## BUILDING PROJECT

The residents of this community are anxiously awaiting for the completion of this project. For them, this building is a symbol of hope in the midst of violence and poverty. Once completed, their efforts will be concentrated on gathering the resources to provide for the basic needs of the children who will be occupying the home, their school fees and necessary health care.

We are thankful that the progress of this construction has been smooth with little complications.

## PRAYER REQUESTS

Please pray for Pastor Kibi as his wife suddenly passed away this month. In his time of grief, he needs his spiritual family to stand with him and support him in prayer.

Hundreds of widows and children continue to gather at the church and school to receive food and clothing. Dedicated volunteers of the church continue to seek donations for food and clothing to replenish their supply. Please continue to pray with us that they are successful in obtaining the local and global support to have enough provisions for the growing need.

Please also pray for safety, as the residents of this city are facing different forms of disease such as cholera, and malaria.
